Calculate Area and Perimeter

Write an Algorithm and draw a Flowchart to Calculate the area and perimeter of a square.

Algorithm:

- Step 1 $\rightarrow$ Start the Program
- Step 2 $\rightarrow$ Get input for the Side 's' as datatype integer
- Step 3 $\rightarrow$ Let , $A = S \times S$
 $P = 4 \times S$
- Step 4 $\rightarrow$ Display Area $\Rightarrow A$
Perimeter $\Rightarrow P$
- Step 5 $\rightarrow$ End of Program

Flowchart:

RPL
05/10/24

Ex. No.: 2

Date: 18/10/2024

Days to Year Conversion

Write an Algorithm and draw a Flowchart to convert the given days into years & months.

Algorithm:

- Step 1 $\rightarrow$ Start the Program
 Step 2 $\rightarrow$ Get Input for Number of Days as 'N'
 Step 3 $\rightarrow$ Let, $\text{years} = N/365$
 $\text{Month} = (N \% 365) / 30$
 Step 4 $\rightarrow$ Display year and month
 Step 5 $\rightarrow$ End of Program

Flowchart:

Rpl
05/10/24

Ex. No.: 3

Date: 18/10/2024

Prime Number

Write an Algorithm and draw a Flowchart to check whether the given number is Prime or not.

Algorithm:

Step 1 → Start the Program

Step 2 $\rightarrow$ Get input of a Number 'N' to check its Prime or Not.

Step 3 $\rightarrow$ Initialize the loop variable 'i'.

Step 4 $\rightarrow$ Start loop variable from 1 and end with N .

Step 5 $\rightarrow$ Check, $N \% i = 0;$

$C = C + 1$, end loop .

Step 6 $\rightarrow$ if $c = 2$, Display Prime Number.
else, Display Not Prime Number.

Step 7 $\rightarrow$ End of Program

Flowchart:

~~Rd~~
22/11/24

Ex. No.: 4

Date: 18/10/2024

Leap Year

Write an Algorithm and draw a Flowchart to check whether the given year is Leap year or not.

Algorithm:

- Step 1 → Start the Program
Step 2 → Get input of a year 'N' to check its leap year or Not.
Step 3 → Check $N \% 4 = 0$, Display Leap year
Step 4 → Else, Display Not a Leap year
Step 5 → End of Program

Flowchart:

Ex. No.: 5

Date: 18/10/2024

Palindrome Number

Write an Algorithm and draw a Flowchart to check whether the given number is palindrome number or not.

Algorithm:

- Step 1 $\rightarrow$ Start the Program
 Step 2 $\rightarrow$ Compute the Input Number
 Step 3 $\rightarrow$ $\text{Reminder} = n \% 10$
 $\text{Reverse} = \text{Reverse} * 10 + \text{Reminder}$
 Step 4 $\rightarrow$ If $\text{Reverse} = \text{TempNum}$, Display its Palindrome
 Step 5 $\rightarrow$ Else, Display Not Palindrome
 Step 6 $\rightarrow$ End of Program

Flowchart:

Ex. No.: 6

Date: 18/10/2024

Sum of Digits

Write an Algorithm and draw a Flowchart to calculate the sum of digits in the given number.

Algorithm:

Step 1 → Start the Program

Step 2 → Get input N

Step 3 → Give $temp = N$, $Rem = temp \% 10$, $Sum = 0$ Step 4 → $Sum = Sum + Rem$
 $temp = temp / 10$ Step 5 → Repeat until ($temp > 0$)

Step 6 → Display Sum

Step 7 → End of Program

Flowchart:
